

THE POND BEAST

#AL2800

The Pond Beast is a “true trickle filter” for ponds. Unlike any other filter in the pond industry, this work of art is equipped with patented plastic media, built from cast acrylic, comes complete with drip trays, easily and inexpensively discarded dual pre-filters, a spray bar, 1” inlet and two 1” outlets and a safety overflow. Simply, this unit easily handles any pond.

Combined with a quality pump, an Aquarium Life Support Systems Intake Screen, and a Danner Mfg UV Sterilizer, we can say you will have a clear water experience. For extremely heavily loaded large Koi Ponds check out our Ultimate Koi Pond in the Pond Solutions and check out adding a Bubble Bead Filter to the most efficient form of biological filtration - the Pond Beast.

Standard Features:

- Easy, above-ground installation & maintenance
- High surface area for biological filtration
- Increased oxygen levels
- Higher redox potentials
- Flow rates to 1200gph
- Safety overflow
- Ample room for filter media
- Easily supports UV sterilizers
- Lifetime Warranty

Specifications:
