

## BARLEY STRAW BALES

**Aqualife Barley Straw Bales** contain natural, beneficial compounds to help keep ponds clear and clean.

Convenient and easy to use, **Aqualife Barley Straw Bales** offer your pond the complete solution to water clarity problems year round.

- Leaves water crystal clear without harsh chemicals
- Conditions cloudy, green water
- Improves water quality
- Economical large size
- Reduces maintenance
- Completely biodegradable

**Directions:** Begin treatments in early spring. Place the loosened bale in an area of the pond that is well oxygenated and where water can easily pass through the bale. Areas near the return from the filter or waterfall where water circulation is high are excellent. Use in combination with **AquaLife Water Garden Cleaner**. **AquaLife Barley Straw Bales** will become active and begin to inhibit unwanted algae growth and the accumulation of waste products over a period of days as decomposition continues. The combination of **AquaLife Barley Straw Bales** and good filtration leaves ponds crystal clear and healthy for all plants and fish. If you prefer a liquid, **AquaLife Barley Extract** is an effective alternative to barley bales.

Each 2-bale package treats up to 1,000 gallons of pond water for up to three months. Begin a second treatment before the first bales have fully decomposed. Two bales per pack.

**Product: Barley Straw Bales**

**Category:** Additives and Supplements, Pond

**Unique Product Features**

- All natural, safe and effective pond water clarity management
- Does not deplete dissolved oxygen
- Non-toxic, safe for all aquatic life, humans and pets
- Biodegradable and eco-friendly

**Packaging:** 2 Bales - 120gr/4oz treats up to 1,000 gallons for 3 months

**Product Rationale**

Pond keepers have long recognized the value of barley straw in helping to keep pond water clear.

All natural **AquaLife Barley Straw Bales** help maintain pond water clarity without harsh chemical treatments. Barley straw is an environmentally safe method of controlling unsightly green water and biological waste, leaving your pond clear and healthy.

As **AquaLife Barley Straw Bales** decompose, they release important by-products into the water that inhibit the proliferation of green organisms and organic waste that cloud and color the water.
