In addition to the common diseases listed, **AquaLife proCURE** has been shown to be effective against Trichodina and other diseases.

## AquaLife proCURE

**AquaLife proCURE** is a proven, effective medication for freshwater and marine aquaria, and ponds. **Do not use in reef tanks.**

Care must be taken to ensure accurate dosing and should only be used in ponds when an exact volume is known.

Although normally safe when used as directed treatments of any type are safest in a quarantine tank, if possible.

**Dosage:** Dose **AquaLife proCURE** at a rate of one teaspoonful (~5 mL) per 10 gallons of water. This dosage produces a nominal concentration of 0.05 mg/L of malachite green and 15 mg/L of formalin. Treat at a maximum of one dose every eight hours. Watch for signs of stress: heavy breathing; gulping for air; darting; etc. Be prepared to do a 50% water change. Use **AquaLife Complete** following a water change.

Do not exceed the dosage recommended above.

**Contraindications:** Do not use with sulfur-based or sulfur-smelling water conditioners. Use only with **AquaLife Complete**. Do not allow product to freeze. If crystals are noted when opening, discard the product.

**Product:** AquaLife proCURE  
Category: Medications

**Ingredients:** Water, Formaldehyde (<5%), Methanol (<2%), Malachite Green Chloride (<0.1%)

**Packaging:** Available in 4oz, 16oz, and 1 gallon sizes. 16oz treats 960 gallons.

Keep out of reach of children.

Not for human consumption.

Not for use with fish for human consumption.

**CALIFORNIA WARNING:** AquaLife proCURE may contain ingredients known to the State of California to be potential or actual carcinogens (cancer causing) or teratogens (birth defects causing).
