

AMMINO-GLOW AMINO ACID COMPLEX

- Stimulates budding and tissue growth
- Encourages vibrant color
- Aids tissues repair
- Fortified with Vitamin C and other nutrients
- Excellent for stony and soft corals, and fish

A nutritional supplement and food soak that contains essential L-amino acids, simple sugars, and vitamin C. Unlike other products, AMINO GLOW contains only L-amino acids that are preferentially taken up by stony corals, according to recent scientific research. Virtually 100% of the nutrients added are absorbed, without significantly affecting protein skimming. Simple sugars stimulate beneficial bacterial growth that reduces nitrate and phosphate, while vitamin C helps protect fish and invertebrates from deficiencies.

AMMINO-GLOW AMINO ACID COMPLEX

AquaLife AMINO-GLOW contains only food grade ingredients in a stable liquid form that needs no refrigeration. Amino acids are preferentially taken up by corals from the surrounding water, and are believed to play a role in the development of UV-protective pigments that impart attractive colors to many coral varieties. Regular use of AMINO-GLOW should increase overall coral health, while maintaining or improving vibrant coloration. While some aquarists report noticeable changes within two weeks, a month to six weeks may be required for improvement, depending upon the prior condition of the aquarium.

Size: Available in 8oz (237ml) and 16oz (473 mL) sizes

Contains a proprietary mixture of purified L-amino acids known to be taken up by corals, supplemented with vitamin C and organic carbon sources.

Directions: Shake well. Add 1 teaspoon (5 ml) per 25 gallons net aquarium capacity daily. Observe response of the organisms and adjust feeding quantity appropriately. Each aquarium is slightly different. May also be used as a food soak. Mix measured dose with a small amount of aquarium water and soak food up to 30 minutes before feeding. Does not require refrigeration. Shelf life 2 years from date of purchase.

Keep out of reach of children.
Not for human consumption.
Not for use with fish for
human consumption.
