

- Eliminates string debris
- Extends filter system life
- Digests sludge build-up
- Eliminates odors
- Actually cleans filter systems
- Is formulated for spring, summer and fall use

Calculating Pond Volume:

Rectangular Pond: Length (ft) x Width (ft) x Depth (ft) X 7.48 = Pond Volume in Gallons

Circular Pond: Diameter (ft) X Depth (ft) X 23.5 = Pond Volume in Gallons

AquaLife Sludge Cleaner Pro Pond Sludge and Odor Eliminator

AquaLife Sludge Cleaner Pro Pond Sludge and Odor Eliminator eliminates both top and bottom sludge and odors in ponds of all sizes. Our proprietary blend of natural bacterial strains and enzymes rapidly biodegrades suspended particles and sediments, improving both water quality and clarity. Effective against all types of organic blooms, the product also eliminates foul odors associated with stagnant water. Environmentally friendly, Sludge Cleaner Pro contains nothing harmful to fish, aquatic plants, pets, or people when used as directed.

Product: AquaLife Sludge Cleaner Pro

Category: Additives and Supplements, Algae Control, Ponds

Unique Product Features: AquaLife Sludge Cleaner Pro was developed as an effective and convenient product to improve water quality and keep ponds clear by reducing unsightly green, stringy debris.

Packaging: 5oz treats 18,750gal, and 1lb-treats 60,000 gal

Directions: Ideal water temperature for use is 60 - 95F. Ideal pH range is 6.5-8.5. Initially apply 4 tablespoons per 1000 gallons. Re-apply one tablespoon per 1000 gallons every 7-10 days. If salt concentration is greater than 8 parts per thousand, double the recommended dosage.

Caution: Discontinue ultraviolet sterilization, foam fractionation and/or ozone generation for a minimum of four days after each treatment with this product. Do not use in ponds undergoing treatment with antimicrobial chemicals or antibiotics. Do not use if copper concentration in pond is greater than 0.05 ppm.

Precautions: Not for human consumption. Keep out of reach of children. Handle with dry hands. Avoid inhalation of dust. Repeated contact can cause allergic reaction in hypersensitive people. Wash with soap and water after using. If swallowed, drink one or two glasses of water to dilute and seek medical attention.

This product is not a pesticide, algacide, toxin or chemical. User assumes full responsibility for any application, and any claim made for this product which is not part of this label.
