

POND FERTILIZER TABLETS

10 - 20 - 10

Aqualife Pond Fertilizer Tablets supply necessary elements required by most aquatic pond plants for active flowering and strong vegetative growth.

- All natural, non-toxic, biodegradable and eco-friendly
- Does not cause algae blooms
- Does not cloud water
- Easy to use, just push tablets into the planting medium
- Safe for fish, plants, pets and people

AquaLife Pond Fertilizer Tablets maximize color and blooming and encourage strong vegetative growth of most pond plants. Our Fertilizer Tablets are slow release and do not dissolve when added to water.

Many aquatic plants grow vigorously during the spring and summer season. Use **AquaLife Pond Fertilizer Tablets** more generously at regular intervals during this period of active growth and increased nutrient absorption.

Product: Pond Fertilizer Tablets

Category: Additives and Supplements, Pond

Unique Product Features

- Slow release
- Does not dissolve in water
- Does not encourage algae growth
- Non-toxic, safe for all aquatic life, humans and pets
- Biodegradable and eco-friendly

Packaging: 10 tablets per package

Product Rationale

To replenish nutrients depleted by normal growth activity in potted pond plants.

Directions: Push **AquaLife Pond Fertilizer Tablets** into the growing medium monthly, or every other month, during periods of active growth and heavy flowering. Use one tablet for pots up to 8" in diameter and 2-3 tablets for gallon pots or larger.

New pond plants should be fertilized when added to the pond and after dividing and repotting.
