

PONDMASTER®

PRO HY-DRIVE™ PUMPS

THE PONDMASTER® PRO HY-DRIVE™ PUMPS unique, high-capacity pumps designed specifically for use in larger pond installations or multi-tank aquariums. Next generation HY-Drive design combines the benefits of magnetic- and direct-drive technologies to deliver an extremely quiet, energy efficient, low maintenance pumping source. Three models, delivering up to 4800 GPH, HY-Drive pumps go easy on the wattage, yet are powerful enough to create a dynamic, attractive waterfall, drive a medium- to large-size skimmer, or service large commercial and residential aquariums.

The heavy-duty polypropylene enclosure has a built-in carry handle and an effective molded-in debris screen. HY-Drive pumps can be positioned vertically or horizontally and are equally at home underwater as a submersible pump or as an inline, external pumping source for a variety of aquatic and aquarium installations. Available in 3200 GPH, 4000 GPH and 4800 GPH capacities.

FEATURES

- Powerful, efficient hybrid magnetic/direct drive motor
- Whisper-quiet operation
- For use in ponds and aquariums
- Fish-safe because no oil is used
- Continuous duty operation
- Convenient carry handle
- Inline and submersible operation
- Includes extra-large clog-resistant filter screen
- Back-flow check valve supplied
- Extra long 20' power cord with grounded plug
- 1 Year warranty
