

Protein Skimmers

Model 22R Skimmer

This high performance skimmer is counter current air driven. A wooden air stone gives maximum bubble count and the unique base provides stability. Requires a water source and air pump, not included. The 22R is perfect for skimming prior to a trickle filter. Hook up and instructions are included that describe how to drain water into the skimmer, which is not possible with Venturi Skimmers. Top cup is removable for easy access and cleaning. 1/2" inlet and outlet that includes water height adjustment unit. Height is 21".

Model 22V Skimmer

This skimmer is venturi driven. Unique injection side venturi pump (included) provides optimal bubble count and water source for this unit. Everything for maximum performance is included. Drain over a sponge to prevent bubble flow into the filter. Needle wheel pump is optional. The unique base provides stability when filled with water. Top cup is removable. 1/2" inlet and outlet that includes water height adjustment unit.

Height is 21"

Bubble Stopper

This unit is designed for the 22V and 22R or for any system to prevent bubbles from entering the sump while adding a reactor for chemical filtration. Unit comes standard with a sponge to mechanically filter the water and prevent bubbles from entering the sump and can be filled with Phos-Guard or pelleted carbon.

44V Magnum Skimmer

The 44V Magnum Skimmer uses a 700gph intake venturi and comes complete with pump or Needle wheel (optional), ex-large collection cup, and hook up parts. The injection molded cup, clear conical neck, 4.5" diameter body, and 24" height produce optimum skimming on systems up to 300 gallons. This is the perfect skimmer for advanced reef tanks and heavily loaded fish aquariums. Use in any sump or trickle filter with adequate space. This unit is perfect for the UP2000 filter. The drain should be run into the Model G of the UP2000 filter which will add chemical filtration and prevent all bubbles from entering the aquarium. The Model G Reactor can be purchased separately to use with other filter models. The 44V Magnum can be taken apart for cleaning. Its durable white construction prevents algae buildup that occurs in clear skimmers when exposed to light from refugiums. Dimensions: 6 x 24".
